

Reality Check

2024 Evaluation of Offshore Wind in South Korea

Author: Erik Roelans, CEO ER-Marine.

Date: 25 February 2024

Report: 2505-24 V.2.

CONTENT

Contact and disclaimer	4
Abbreviations	5
1 Introduction	6
1.1 Overview of Offshore Wind Energy South Korea	6
1.2 South Korea's Commitment to Renewable Energy	7
2 Policy and Regulatory Landscape	8
2.1 Government Initiatives and Policies	8
2.2 Special Act Offshore Wind	9
2.3 2023 Wind Power Fixed Price Contract Competitive Bid Announcement	11
Was this a desirable auction scheme?	11
What revenues can we expect based on the 2023 Wind Auction?	11
2.4 Bidding parameters 2023 Auction evaluation	13
60 points: Quantitative evaluation of the bid price	13
40 points: Non – financial evaluation	13
08 points: Resident acceptability	13
16 points: Domestic Economy Industrial effect evaluation	13
Contribution to the domestic economy	13
Contribution to the Domestic Supply Chain	13
04 points: Domestic business performance	14
04 points: Project Progress	14
08 points: Grid Performance	14
2.5 Technical bidding parameters 2023 Auction evaluation	15
Reactive power supply capability performance (2 points):	15
Grid connection LVRT performance (2 points)	15
Grid availability energy at the planned location (4 points):	15
2.6 The Selection of competitive bidding operators for wind power 2023 auction	16
What about Chinese wind turbine suppliers? Impact expected?	17
How to create win- win scenarios without running into the LCR trap?	18
2.7 The "Marine-use Impact Assessment Act"	18
The key principles of the law include:	18
Addressing the fishermen conflict: Is the Act sufficient?	19
3 Investment and Economic Impact	20
3.1 Financial Investments in Offshore Wind 2023	20
How to we fund all these offshore wind projects?	20
3.2 Financial developments in January 2024	22
Support for the development of large-scale offshore wind farms by the public	22
Analysis of South Korea's offshore wind target and the implications of not endorsing the Special Act in 2023	24
Current Support and Strategies (as per Section 18)	25
Challenges without the "Offshore Wind Power Special Act" endorsed	25
4 Challenges and Solutions	26
4.1 Permitting challenges	26
Challenges with the Ministry of National Defence	27

Site and Spatial Data sharing	28
Explicit Local Content Requirement (LOR)	28
Construction licenses	29
Lack of suitable vessels	29
Korean Labor Law and the vessel' crew	30
Seafarers Act Article 3 (1)	31
Seafarer's Act Chapter VI Working hours and time to rest Article 60	31
What is the relevance for offshore wind in South Korea?	32
Crew visas: – a challenge	32
4.2 <i>Environmental and Social Concerns</i>	32
Fishermen Challenges	32
Local Communities play a crucial role in promoting coexistence	34
4.3 <i>Grid development</i>	35
4.4 <i>Strategies to Overcome Challenges</i>	36
5 Success Stories and Milestones	37
5.1 <i>Noteworthy Achievements in Korean Offshore Wind Energy 2023</i>	37
6 Future Outlook and Recommendations	38
6.1 <i>Growth Potential of Offshore Wind Energy South Korea for 2024 – 2030</i>	38
6.2 <i>Policy Recommendations for Further Development</i>	38
The development of Ports and Marshalling infrastructure	38
Trade Ports: Dual Functionality	39
1. State-managed trade ports:	39
Coastal ports serve both national and local needs	39
Development of a competent Workforce	40
Supply Chain challenges	40
Korean Carbon- Free Energy versus RE100	41
6.3 <i>Opportunities?</i>	43
EU-Korea Green Partnership:	43
Priority Areas for Cooperation	45
Climate Action	45
Environmental Protection	45
Clean and just Energy Transition	46
Facilitating Transition with 3rd Party Countries	47
Other areas of co-operation	47
Business Cooperation:	47
Sustainable Finance:	47
Research & Innovation:	47
Sustainable food systems:	48
Employment and social implications:	48
Governance/Processes	48
7 Conclusion	48
